## SUMMARY

I am a beginner Java Developer with good knowledge of Core Java, Spring Boot, and SQL. I have made projects like School Management System and Library Management System where I connected the application with a database and created APIs. I know how to add, update, delete, and manage data securely. I am currently pursuing MCA and want to gain real-world experience to improve my skills and grow as a software developer.

---

## PROJECTS

### Room Rent Application

Developed a Room Rent Application using Spring Boot, MySQL, and REST APIs to manage room listings, tenant details, and booking records. Implemented CRUD operations, database integration, and basic authentication features to ensure efficient room management.

### Working on School Management System

Developing a School Management System using Java and Spring Boot with JWT-based authentication and role-based access control. The system includes user registration with unique ID generation, email-based credential delivery, student and teacher management, and fee management integrated with MySQL database. Implemented secure REST APIs and layered architecture following enterprise-level backend practices.

### 2 Minor Project

- Library Management System (CRUD Operation)
  - Contact Management System (OOPS, Collections)
- 

## EDUCATION

### Master of Computer Application

Scope Global Skills University

Sep 2024 - Oct 2026

### Bachelor of Computer Application

Dr C V Raman University (Vaishali) ,Grade-7.48CGPA

Aug 2021 - July 2024

### Senior Secondary

JP+2 Inter College ,Grade-60%

Aug 2019 - Mar 2021

### Secondary School

Resonance International School

Mar-2019

---

## ADDITIONAL INFORMATION

- **Technical Skills:** Java,Html,Css, Basic Spring Suit Tools ,Oops,Microservices, Mysql,RDBMS,DBMS
- **Languages:** English, Hindi
- **Certifications:** JAVA FULLSTACK DEVELOPER from KodNest (Banglore)
